

Egypt Demo Playbook

Universal Credit Hub — Pan-African Credit Registry

Confidential · May 2026 · Presentation Day: 11:00 AM EET

Egypt Demo Playbook — Universal Credit Hub

Audience: Egyptian financial-sector prospects, Central Bank of Egypt (CBE) supervisors, Egyptian Financial Regulatory Authority (FRA) stakeholders, and investor stakeholders

Date: May 2026 | Version 1.0 | Confidential

Opening Statement

"Egypt is Africa's second-largest economy and its most strategically positioned credit market — more than 105 million people, a rapidly expanding digital financial ecosystem anchored by Fawry, Meeza, and a thriving mobile wallet network, yet NPL ratios persistently above 3% because lenders cannot see a borrower's full exposure across institutions. Universal Credit Hub changes that. In the next 20 minutes I will show you a live, production-grade platform that consolidates credit information across every Egyptian institution, surfaces explainable AI risk scores with Arabic-language narratives, and is pre-wired for CBE regulatory reporting — out of the box. By the end of this session you will see exactly how UCH can reduce your bad-loan ratio, accelerate credit decisions from days to seconds, support Egypt's Financial Inclusion Strategy 2030 objectives, and position your institution at the forefront of responsible digital lending across North Africa and the MENA region."

Key Egypt Market Facts

Metric	Value	UCH Relevance
GDP (2024)	USD 348 billion	Second-largest economy on the continent; primary North African credit hub
Population	105 million+	One of the largest potential credit markets in Africa and MENA
Banked population	~56% of adults	Large underserved segment addressable via Fawry, mobile wallet, and utility alternative data
Active mobile wallet users	30 million+ (Vodafone Cash, Orange Money, Etisalat Cash, Meeza)	UCH ingests mobile wallet transaction data as a structured alternative credit signal
Licensed commercial banks	38 (CBE-licensed)	Each bank is a UCH data provider and subscriber
Licensed microfinance entities	900+ NGOs and companies	MFI data contribution unlocks scoring for the informal and micro-enterprise segments
Non-performing loan ratio	~3.2% (CBE Q4 2024)	UCH risk engine directly targets NPL reduction
Fawry transaction volume	4 billion+ annual transactions	Fawry payment regularity is a powerful thin-file creditworthiness signal
Data protection framework	Personal Data Protection Law No. 151/2020	UCH consent layer maps to Egypt's PDPL lawful-basis and data-subject-rights requirements
Credit bureau regulator	Central Bank of Egypt (CBE)	UCH regulatory exports match CBE credit bureau returns format
Local currency	Egyptian Pound (EGP)	UCH natively handles EGP alongside 40+ African and global currencies

Metric	Value	UCH Relevance
Financial inclusion target	Egypt Financial Inclusion Strategy 2030	UCH's alternative data scoring directly advances CBE's stated inclusion mandate

Step-by-Step Demo Flow

Step 1 — Platform Login & Workspace Overview

What to do: Navigate to the platform login page. Click the **Registry Authority** quick-launch button to auto-fill the demo credentials and log in.

Talking points:

- "Notice the homepage -click demo login — in a real deployment this would be SSO via your bank's Azure AD, Google Workspace,

Credential table:

Account	Password	Role	What it can access
demo_admin	TestPass2026!	Platform Owner	All 3 workspaces
credit_admin	Credit26	Credit Bureau Admin	Credit Bureau only
john doe	SecuredCreditor2026!	Secured Creditor	Credit + Collateral
registry_admin	TestPass2026!	Registry Authority	Credit Bureau

Step 2 — Credit Bureau Dashboard

What to do: After login, navigate to the main **Dashboard**. Point out the KPI strip and the interactive Africa map.

Talking points:

- "This KPI strip updates in real time — total borrowers, active credit facilities, monthly inquiries, and the platform's average credit score. All figures can be dis

played

in
E
G
P."

- "The interactive SVG Africa map highlights 54 countries over age. Click Egypt to drill down to Egypt-specific metrics including EGP-denominated

Closing Statement

"What you have seen today is not a prototype — it is a production-grade platform handling real data at scale. UCH is already architected for CBE credit bureau licensing requirements, Egypt's Personal Data Protection Law No. 151/2020, Fawry and mobile wallet alternative data ingestion, Arabic-language AI narratives, and collateral registration under Egyptian law. Onboarding your institution takes four steps: data-sharing agreement, API credential provisioning, bulk historical National ID-keyed upload, and go-live. Our team can have you ingesting live data within 30 days. Egypt's CBE Financial Inclusion Strategy 2030 and the rapid growth of Fawry and digital wallets are creating exactly the conditions where a modern credit infrastructure delivers the most impact. The question is whether your institution wants to be a founding data partner and capture the pricing advantages that come with it. What questions do you have?"

Tough Questions & Suggested Responses

Question	Suggested Response
"Is our borrower data safe with you?"	"Data is encrypted at rest (AES-256) and in transit (TLS 1.3). Each institution's data is tenant-isolated — your data is never visible to another institution in raw form. All access is logged in a blockchain-anchored audit trail. We welcome CBE and FRA examiners to review our security architecture at any time."
"The CBE already has a central credit registry — why UCH?"	"The CBE's I-Score and central registry capture what institutions report. UCH adds what institutions currently cannot see: Fawry payment regularity, mobile wallet transaction patterns, utility payment history, and microfinance data. Our NPL backtesting on MENA loan portfolios shows a 22% improvement in default prediction accuracy over traditional bureau data alone."
"How does UCH handle National ID data under PDPL 151/2020?"	"National ID data is processed under the lawful bases established by Egypt's Personal Data Protection Law. UCH never stores raw National ID credentials — only derived, pseudonymised identifiers. Access to National ID-linked records requires explicit borrower consent or a regulatory exemption, both of which are enforced in the platform and logged for PDPL audit purposes."
"Can the AI narrative really be trusted in Arabic?"	"The Arabic narrative is generated natively by the AI models using Arabic financial terminology — it is not a post-hoc translation. We benchmark output quality against Egyptian banking sector terminology standards. Your Arabic-speaking credit officers can review and validate narratives; any disputed narrative is logged for model improvement."
"What happens if your platform goes down?"	"We operate on Neon PostgreSQL with automatic failover and a 99.9% SLA. All data is replicated across two geographic zones. You retain a full encrypted data export at any time — you are never locked in."
"Do you have CBE approval?"	"We are in active dialogue with the CBE under its regulatory sandbox and SupTech engagement framework. Our architecture was designed from day one to meet CBE credit bureau licensing requirements — consent layer, data sovereignty within Egypt, full audit trail. We welcome CBE representatives to a dedicated technical review session."
"How long does onboarding take?"	"30 days: data-sharing agreement (week 1), API credentials and sandbox testing (week 2), bulk National ID-keyed historical upload (week 3), UAT and go-live (week 4). A dedicated implementation engineer is assigned throughout."
"What does it cost?"	"Pricing is transaction-based — you pay per inquiry, not a flat monthly fee. This aligns our incentives with your usage. Founding data partners receive a 40% discount on inquiry fees for the first 24 months in exchange for historical data contribution."

Question	Suggested Response
"Can we keep our data inside Egypt?"	"Yes. The recommended path for strict data sovereignty is on-premises deployment in your own data centre — UCH fully supports this model and can deploy to your existing infrastructure in Cairo, Alexandria, or any Egyptian location. For institutions that prefer managed cloud, we operate on the nearest available hyperscaler zone with data-residency controls and contractual data-processing agreements that restrict data movement outside Egypt. Data does not leave Egyptian jurisdiction without your explicit authorisation for cross-border PAPSS or MENA data sharing."

Night Before Checklist

- ☐ Confirm demo environment is accessible at the platform URL
- ☐ Verify demoadmin and registryadmin credentials work (TestPass2026!)
- ☐ Switch the platform language to Arabic — confirm right-to-left layout renders correctly
- ☐ Check that the Africa map loads and Egypt is highlighted
- ☐ Run a sample borrower search — confirm a credit report generates with AI insights
- ☐ Switch AI narrative to Arabic — confirm Arabic text and right-to-left rendering appear
- ☐ Confirm the alternative data section shows Fawry and mobile wallet signals
- ☐ Test the Collateral Registry lien search with a sample vehicle chassis number
- ☐ Download a sample PDF credit report — confirm Arabic narrative option and branding appear
- ☐ Open the Consumer Portal in an incognito window — confirm Arabic-language score lookup works
- ☐ Have the CBE regulatory export page ready to navigate to quickly
- ☐ Charge your laptop. Have a mobile hotspot as backup internet.
- ☐ Bring printed one-page tear-sheets for each attendee (UCH overview + contact details in English and Arabic)
- ☐ Confirm who from the prospect side will attend — note whether CBE examiners or FRA representatives will be present
- ☐ Prepare the Fawry alternative data talking point — Egypt-specific and tends to generate strong engagement
- ☐ Prepare the Arabic AI narrative demo — it is the single most memorable moment in Egyptian prospect rooms
- ☐ Set your alarm. Arrive 20 minutes early to set up the screen share.
