

Kenya Demo Playbook

Universal Credit Hub — Pan-African Credit Registry

Confidential · May 2026 · Presentation Day: 11:00 AM EAT

Kenya Demo Playbook — Universal Credit Hub

Audience: Kenyan financial-sector prospects, CBK supervisors, CRB stakeholders, and investor stakeholders
Date: May 2026 | Version 1.0 | Confidential

Opening Statement

"Kenya is the most sophisticated credit market in sub-Saharan Africa — home to the world's most advanced mobile money ecosystem, a functioning Credit Reference Bureau framework, and a Central Bank that has been a genuine pioneer in digital finance regulation. Yet even here, lenders face a painful paradox: M-Pesa moves more money per day than many stock exchanges, but most of that transaction richness never makes it into a credit score. Universal Credit Hub changes that. In the next 20 minutes I will show you a live, production-grade platform that consolidates bureau data and alternative data signals — including M-Pesa flows — into a single, explainable AI credit score, enforces the Kenya Data Protection Act, and generates CBK-compliant regulatory reports out of the box. By the end of this session you will see exactly how UCH can extend credit access to Kenya's next five million borrowers without increasing your NPL ratio."

Key Kenya Market Facts

Metric	Value	UCH Relevance
GDP (2024)	USD 118 billion	East Africa's largest and most diversified credit market
Banked population	~83% of adults	High formal inclusion; UCH captures cross-institution exposure risk
M-Pesa active users	32 million+	UCH ingests M-Pesa transaction data as a primary alternative credit signal
Licensed commercial banks	38 (CBK-licensed)	Each bank is a UCH data provider and subscriber
Registered SACCOs	175 (with loan books)	SACCO data contribution unlocks a significant underserved scoring segment
Credit Reference Bureaus	3 licensed (Metropol, TransUnion, CreditInfo)	UCH aggregates across CRB submissions for a unified 360° borrower view
Non-performing loan ratio	~16.5% (CBK Q4 2024)	UCH risk engine directly targets NPL reduction
Data protection framework	Kenya Data Protection Act 2019 (KDPA)	UCH consent layer maps to KDPA data-subject rights and lawful-basis requirements
Credit bureau regulator	Central Bank of Kenya (CBK)	UCH regulatory exports match CBK CRB supervisory return formats
Local currency	Kenyan Shilling (KES)	UCH natively handles KES alongside 40+ African currencies

Step-by-Step Demo Flow

Step 1 — Platform Login & Workspace Overview

What to do: Navigate to the platform login page. Click the **Registry Authority** quick-launch button to auto-fill the demo credentials and log in.

Talking points:

- "No ticket here, one-click demo login — in a real deployment, this would be SSO via your bank's Azure AD, Google Workspace, or any SAML 2.0 identity

Credential table:

Account	Password	Role	What it can access
demo_admin	TestPass2026!	Platform Owner	All 3 workspaces
credit_admin	Credit26	Credit Bureau Admin	Credit Bureau only
john doe	SecuredCreditor2026!	Secured Creditor	Credit + Collateral
registry_admin	TestPass2026!	Registry Authority	Credit Bureau

Step 2 — Credit Bureau Dashboard

What to do: After login, navigate to the main **Dashboard**. Point out the KPI strip and the interactive Africa map.
Talking points:

- "This KPI strip updates in real time — total borrowers, active credit facilities, monthly new inquiries, and the platform-wide average credit score."
- "The interactive SVG

Closing Statement

"Kenya already has the most mature digital credit ecosystem in sub-Saharan Africa — M-Pesa, three licensed CRBs, a progressive CBK, and a tech-savvy borrower base. UCH does not replace any of that. It integrates with it, adds the alternative data layer that the existing bureaus do not have, and wraps it in the explainable AI and KDPA compliance tooling that the next wave of CBK regulation will require. Onboarding takes four steps: data-sharing agreement, API credential provisioning, bulk historical ID-keyed upload, and go-live — 30 days. Founding data partners receive a 40% discount on inquiry fees for 24 months. Kenya's credit market is ready for this. Is your institution? What questions do you have?"

Tough Questions & Suggested Responses

Question	Suggested Response
"We already submit to Metropol, TransUnion, and CreditInfo. Why add UCH?"	"Those three bureaus each see a slice of the market. UCH aggregates across all submissions and adds the alternative data — M-Pesa, SACCO, utilities — that no existing CRB currently scores. Our backtesting on Kenyan portfolios shows a 23% improvement in default prediction over traditional bureau data alone."
"Is our borrower data safe with you?"	"Data is encrypted at rest (AES-256) and in transit (TLS 1.3). Each institution's data is tenant-isolated. All access is blockchain-logged. We welcome CBK and ODPC review teams to examine our architecture."
"How does UCH handle M-Pesa data legally?"	"M-Pesa data is ingested only with explicit borrower consent, consistent with the KDPA's lawful-basis requirements. The consent flow is built into the UCH consumer portal — borrowers grant, view, and revoke data permissions from a single screen."
"What about the Kenya Data Protection Act obligations?"	"The UCH consent layer maps directly to KDPA data-subject rights: access, rectification, erasure, and objection to automated decisions. The explainable AI narrative satisfies KDPA's automated-processing disclosure requirement. Our Data Processing Agreement is KDPA-compliant and ready to sign."
"What happens if your platform goes down?"	"We operate on Neon PostgreSQL with automatic failover and a 99.9% SLA. Data is replicated across two geographic zones. You retain a full encrypted data export at any time — no lock-in."
"Do you have CBK approval?"	"We are in active dialogue with the CBK under its regulatory sandbox framework. Our architecture was built from day one to meet CBK CRB licensing requirements. We welcome CBK representatives to a dedicated technical review session."
"How long does onboarding take?"	"30 days: data-sharing agreement (week 1), API credentials and sandbox testing (week 2), bulk National ID-keyed historical upload (week 3), UAT and go-live (week 4). A dedicated implementation engineer supports you throughout."
"Can we keep data inside Kenya?"	"Yes. UCH supports private-cloud deployment within Kenya on AWS af-south-1 (Cape Town — nearest available AWS zone) or GCE africa-east1 (coming 2025), or on-premises in your own data centre. Data does not leave Kenyan jurisdiction unless you explicitly enable cross-border PAPSS sharing."
"What does it cost?"	"Pricing is transaction-based — you pay per inquiry, not a flat monthly fee. Founding data partners receive a 40% discount on inquiry fees for the first 24 months in exchange for historical data contribution. We can model the ROI against your current CRB inquiry costs."

Night Before Checklist

- ☐ Confirm demo environment is accessible at the platform URL
- ☐ Verify demoadmin and registryadmin credentials work (TestPass2026!)
- ☐ Check that the Africa map loads and Kenya is highlighted
- ☐ Run a sample borrower search — confirm a credit report generates with AI insights
- ☐ Confirm the alternative data section shows M-Pesa and SACCO signals
- ☐ Test the Collateral Registry lien search with a sample logbook or serial number
- ☐ Download a sample PDF credit report — confirm branding and AI narrative appear in English and Swahili
- ☐ Open the Consumer Portal in an incognito window — confirm score lookup and Credit Freeze toggle work
- ☐ Have the regulatory export page ready to navigate to quickly
- ☐ Charge your laptop. Have a mobile hotspot (Safaricom preferred) as backup internet.
- ☐ Bring printed one-page tear-sheet for each attendee (UCH overview + contact details in English and Swahili)
- ☐ Confirm who from the prospect side will attend — note if CBK or ODPC representatives will be present
- ☐ Prepare the M-Pesa alternative data talking point — it generates the strongest engagement in Kenyan rooms
- ☐ Set your alarm. Arrive 20 minutes early to set up the screen share.
