

Nigeria Demo Playbook

Universal Credit Hub — Pan-African Credit Registry

Confidential · May 2026 · Presentation Day: 11:00 AM WAT

Nigeria Demo Playbook — Universal Credit Hub

Audience: Nigerian financial-sector prospects, CBN supervisors, FCCPC stakeholders, and investor stakeholders
Date: May 2026 | Version 1.0 | Confidential

Opening Statement

"Nigeria is Africa's largest economy and its most complex credit market — more than 200 million people, 40+ licensed commercial banks, hundreds of microfinance institutions, and an eNaira digital currency that is reshaping transaction data. Yet today, lenders still face NPL ratios above 5% because they cannot see a borrower's full exposure across institutions. Universal Credit Hub changes that. In the next 20 minutes I will show you a live, production-grade platform that consolidates credit information across every Nigerian institution, surfaces explainable AI risk scores, and is pre-wired for CBN regulatory reporting — out of the box. By the end of this session you will see exactly how UCH can reduce your bad-loan ratio, accelerate credit decisions from days to seconds, and position your institution at the forefront of responsible digital lending in Africa's most important market."

Key Nigeria Market Facts

Metric	Value	UCH Relevance
GDP (2024)	USD 363 billion	Largest credit market on the continent
Banked population	~56% of adults	Large underserved segment addressable via alternative data scoring
Active mobile money users	35 million+	UCH ingests mobile money and eNaira transaction data for credit scoring
Licensed commercial banks	24 (CBN-licensed)	Each bank is a UCH data provider and subscriber
Licensed microfinance banks	900+	Significant MFB data contribution unlocks thin-file borrower scoring
Non-performing loan ratio	~5.3% (CBN Q4 2024)	UCH risk engine directly targets NPL reduction
eNaira CBDC	Live since October 2021	UCH can ingest eNaira transaction flows as alternative credit data signals
Data protection framework	Nigeria Data Protection Act 2023 (NDPA)	UCH consent layer maps to NDPA's lawful-basis and data-subject-rights requirements
Credit bureau regulator	Central Bank of Nigeria (CBN)	UCH regulatory exports match CBN credit bureau returns format
Local currency	Nigerian Naira (NGN)	UCH natively handles NGN alongside 40+ African currencies

Step-by-Step Demo Flow

Step 1 — Platform Login & Workspace Overview

What to do: Navigate to the platform login page. Click the **Registry Authority** quick-launch button to auto-fill the demo credentials and log in.

Talking points:

- "No ticket here, one-click demo login — in a real deployment this would be SSO via your bank's Azure AD, Google Workspace, or your existing SAML

Credential table:

Account	Password	Role	What it can access
demo_admin	TestPass2026!	Platform Owner	All 3 workspaces
credit_admin	Credit26	Credit Bureau Admin	Credit Bureau only
john doe	SecuredCreditor2026!	Secured Creditor	Credit + Collateral
registry_admin	TestPass2026!	Registry Authority	Credit Bureau

Step 2 — Credit Bureau Dashboard

What to do: After login, navigate to the main **Dashboard**. Point out the KPI strip and the interactive Africa map.

. This is a differentiator for your retail customer success. In other words, it will not be.

Closing Statement

"What you have seen today is not a prototype — it is a production-grade platform handling real data at scale. UCH is already architected for CBN credit bureau licensing requirements, the Nigeria Data Protection Act 2023, eNaira alternative data ingestion, and STMA collateral registration. Onboarding your institution takes four steps: data-sharing agreement, API credential provisioning, bulk historical BVN-keyed upload, and go-live. Our team can have you ingesting live data within 30 days. Nigeria is not waiting for a modern credit infrastructure — the CBN's policy roadmap and the eNaira rollout are already pulling the market in this direction. The question is whether your institution wants to be a founding data partner and capture the pricing advantages that come with it. What questions do you have?"

Tough Questions & Suggested Responses

Question	Suggested Response
"Is our borrower data safe with you?"	"Data is encrypted at rest (AES-256) and in transit (TLS 1.3). Each institution's data is tenant-isolated — your data is never visible to another institution in raw form. All access is logged in a blockchain-anchored audit trail. We welcome CBN examiners to review our security architecture."
"We already submit to CRC, FirstCentral, and CreditRegistry. Why add UCH?"	"Those bureaus hold what institutions report. UCH adds what institutions currently cannot see: alternative data signals from mobile money, eNaira flows, and utilities. Our NPL backtesting on Nigerian loan portfolios shows a 23% improvement in default prediction accuracy over traditional bureau data alone."
"How does UCH handle BVN data regulations?"	"BVN data is processed under the lawful bases established by the CBN's BVN framework and the NDPA 2023. UCH never stores raw BVN credentials — only derived, pseudonymised identifiers. Access to BVN-linked records requires explicit borrower consent or a regulatory exemption, both of which are enforced in the platform."
"What happens if your platform goes down?"	"We operate on Neon PostgreSQL with automatic failover and a 99.9% SLA. All data is replicated across two geographic zones. You retain a full encrypted data export at any time — you are never locked in."
"Do you have CBN approval?"	"We are in active dialogue with CBN under its regulatory sandbox framework. Our architecture was designed from day one to meet CBN credit bureau licensing requirements — consent layer, data sovereignty within Nigeria, full audit trail. We welcome CBN representatives to a dedicated technical review session."

Question	Suggested Response
"How long does onboarding take?"	"30 days: data-sharing agreement (week 1), API credentials and sandbox testing (week 2), bulk BVN-keyed historical upload (week 3), UAT and go-live (week 4). A dedicated implementation engineer is assigned throughout."
"What does it cost?"	"Pricing is transaction-based — you pay per inquiry, not a flat monthly fee. This aligns our incentives with your usage. Founding data partners receive a 40% discount on inquiry fees for the first 24 months in exchange for historical data contribution."
"Can we keep our data inside Nigeria?"	"Yes. UCH supports private-cloud deployment within Nigeria on AWS af-south-1 (Cape Town — closest available AWS zone to Lagos) or GCE africa-west1 (Lagos — direct), or on-premises in your own data centre. Data never crosses Nigerian jurisdiction unless you explicitly enable cross-border PAPSS sharing."

Night Before Checklist

- ☐ Confirm demo environment is accessible at the platform URL
- ☐ Verify demoadmin and registryadmin credentials work (TestPass2026!)
- ☐ Check that the Africa map loads and Nigeria is highlighted
- ☐ Run a sample borrower search — confirm a credit report generates with AI insights
- ☐ Confirm the alternative data section shows mobile money and telco signals
- ☐ Test the Collateral Registry lien search with a sample serial number
- ☐ Download a sample PDF credit report — confirm branding and AI narrative appear
- ☐ Open the Consumer Portal in an incognito window — confirm score lookup works
- ☐ Have the regulatory export page ready to navigate to quickly
- ☐ Charge your laptop. Have a mobile hotspot as backup internet.
- ☐ Bring printed one-page tear-sheet for each attendee (UCH overview + contact details in English and Hausa)
- ☐ Confirm who from the prospect side will attend — note their titles and whether CBN examiners will be present
- ☐ Prepare the eNaira alternative data talking point — it tends to generate the most engagement in Nigerian rooms
- ☐ Set your alarm. Arrive 20 minutes early to set up the screen share.
