Credit Score Summary

350

Range 300-850 | Total Facilities: 4 | Active: 4 | Risk Items: 2

Credit Utilization Summary

METRIC	VALUE
Total Credit Limit	1,575,000.00
Total Credit Used	597,686.20
Utilization Ratio	37.9% (Moderate)
Available Credit	977,313.80

SCORE FACTOR	IMPACT	CURRENT VALUE	ASSESSMENT
Payment History	35% weight	1 late	Negative
Credit Utilization	30% weight	37.9%	Good
Credit History Length	15% weight	4 years	Developing
Credit Mix	10% weight	3 types	Diverse
Recent Inquiries	10% weight	0	Low

Score Factor Analysis

- " HIGH_NDIA_90_PLUS: Severe arrears — 90+ days in arrears on one or more accounts
- " DELINQUENT_ACCOUNTS: Delinquent accounts on file
- " WRITTEN_OFF_ACCOUNTS: Written-off accounts present

Score Methodology & Validation

SCORING VARIABLES & WEIGHTS

VARIABLE	WEIGHT/IMPACT	DESCRIPTION
Base Score	+300	Starting score for all borrowers

On-Time Payment Ratio	+500 (max)	Proportion of current/closed accounts vs total
Delinquent Accounts	-50 each	Accounts in delinquent or default status
Written-Off Accounts	-75 each	Accounts written off as losses
Restructured Accounts	-20 each	Restructured/rescheduled facilities
Active Court Judgments	-40 each	Unresolved legal judgments
Credit Inquiries	-5 each (max -100)	Number of inquiries, capped at 20
Score Range	300 - 850	Minimum to maximum possible score

MODEL VALIDATION METRICS

METRIC	DESCRIPTION	STATUS
Gini Coefficient	Model discriminatory power	0.62
KS Statistic	Separation between good and bad	0.48
Rank Ordering	Risk ranking accuracy	Validated
Stress Testing	Model robustness under stress	Passed
Probability of Default	Estimated default probability	Per account

10. Risk Assessment Summary

Overall Risk Level: High

STRENGTHS

- No court judgments or legal actions recorded
- Diverse credit portfolio with multiple active facilities

CONCERNS

- 1 delinquent account(s) on file
- 1 written-off account(s) totalling bad debt
- Low credit score suggests elevated default risk

11. Consumer Statement

CONSUMER-SUBMITTED STATEMENT

No consumer statement has been submitted for this file. Consumers have the right to submit a personal statement of up to 200 words to be included in their credit report, explaining circumstances related to any credit information contained herein.

Under the Credit Reporting Act, consumers have the right to dispute inaccurate information and add a personal statement to their credit file. Contact the Credit Registry to exercise these rights.

AI RISK ASSESSMENT — GPT-4o

CRITICAL RISK Score: 92/100

The borrower has significant outstanding balances across multiple accounts, including one written-off and one defaulted loan. Lack of income information and employment details further exacerbate the risk profile.

CONTRIBUTING FACTORS

- **Employment Status:** Employment details are unknown, making it difficult to assess repayment capacity.
- **Monthly Income:** Income is not reported, which raises concerns about the borrower's ability to service debt.
- **Credit History:** The borrower has one defaulted loan and one written-off loan, indicating poor repayment behavior.
- **Active Credit Accounts:** Two accounts are current, which is a positive sign but insufficient to offset the overall risk.
- + **PEP Status:** The borrower is not a Politically Exposed Person (PEP), reducing regulatory scrutiny.
- + **Open Disputes:** No open disputes are reported, indicating no immediate legal or compliance concerns.

AI RECOMMENDATIONS

- > Conduct a detailed investigation into the borrower's income and employment status.
- > Engage the borrower to restructure or settle the defaulted and written-off loans.
- > Monitor the borrower's active accounts closely to ensure continued repayment.

AI CREDIT NARRATIVE — Claude

Creditworthiness: Poor

This credit report pertains to an individual borrower identified under National ID GHA-BIZ-226482, domiciled in Ghana. At the outset, it must be noted that several fundamental pieces of borrower information are conspicuously absent from the credit file: the borrower's name is not recorded, employment status is listed as unknown, and monthly income has not been reported. The absence of these critical data points significantly undermines our ability to conduct a thorough affordability assessment and raises immediate concerns about the quality of documentation and the transparency of this borrower's financial profile.

The borrower maintains four credit accounts across four different Ghanaian financial institutions, with a total outstanding balance of GHS 597,686.20 against aggregate original facilities of GHS 1,575,000.00. Two of these accounts are in active and current standing: a Business Loan at CalBank with an outstanding balance of GHS 252,017.68 against an original facility of GHS 444,000.00 at a rate of 27.13%, and a Working Capital facility at Universal Merchant Bank carrying a balance of GHS 135,230.43 against an original amount of GHS 453,000.00 at a notably high rate of 32.18%. While these two accounts show zero days in arrears, the interest rates attached to them are exceptionally elevated, suggesting that these lenders have already priced in significant credit risk associated with this borrower.

The remaining two accounts present a deeply troubling credit history. An Agricultural Loan at Zenith Bank Ghana, originally disbursed at GHS 551,000.00, has been written off with a residual balance of GHS 104,133.01. This write-off indicates that Zenith Bank determined the facility to be irrecoverable — a severe adverse credit event by any measure. Additionally, a second Agricultural Loan at Prudential Bank, originally GHS 127,000.00, is currently in default status with an outstanding balance of GHS 106,305.08 and arrears extending to 661 days, representing nearly 22 months of non-payment. The near-full outstanding balance relative to the original disbursement on this Prudential Bank facility suggests that very little principal — if any — has been repaid before the account fell into default.

The pattern emerging from this credit profile is one of systematic failure in the agricultural lending space, with both agricultural facilities resulting in credit losses for the respective institutions. The borrower appears to have pivoted toward business and working capital financing through CalBank and Universal Merchant Bank, which remain current. However, the sustainability of servicing these two active facilities is questionable given the absence of verified income data and the combined outstanding balance of approximately GHS 387,248.11 on these accounts alone, both carrying interest rates above 27%. Without documented income or employment verification, there is no basis to confirm whether the borrower possesses adequate cash flow to continue meeting these obligations.

From a risk perspective, the borrower presents multiple red flags: a written-off facility at Zenith Bank Ghana, a defaulted facility at Prudential Bank with 661 days in arrears, unknown identity details, unverified income, and a pattern of borrowing across multiple institutions that may indicate over-leveraging. The absence of open disputes, while technically neutral, does not mitigate the severity of the adverse credit events on record. The borrower has not been flagged as a Politically Exposed Person, which eliminates one layer of enhanced due diligence concern, but this alone is insufficient to offset the material credit deterioration observed.

In summary, this borrower presents a fundamentally compromised credit profile. The combination of a written-off account, a long-standing default with nearly two years of arrears, incomplete borrower identification, and unverified repayment capacity renders this applicant a high-risk candidate for any new credit extension. We would strongly recommend declining any new facility request until the borrower resolves the defaulted obligation at Prudential Bank, provides full identity and income documentation, and demonstrates a sustained period of rehabilitated credit behavior. The overall creditworthiness assessment for this borrower is Poor.

KEY STRENGTHS

- + Two active facilities at CalBank and Universal Merchant Bank are currently performing with zero days in arrears
- + No open disputes on the credit file, suggesting no contested obligations
- + Borrower is not a Politically Exposed Person, reducing regulatory and reputational risk

KEY RISKS

- Agricultural Loan at Zenith Bank Ghana (GHS 551,000 original) has been written off, indicating a confirmed credit loss
- Agricultural Loan at Prudential Bank is in default with 661 days of arrears, representing nearly 22 months of non-payment
- Borrower identity is incomplete — name is not recorded and employment status and income are unverifiable
- Active facilities carry exceptionally high interest rates (27.13% and 32.18%), reflecting elevated lender-perceived risk
- Total outstanding exposure of GHS 597,686.20 with no verified income to confirm debt service capacity
- Pattern of multi-institutional borrowing with concurrent defaults may indicate over-leveraging
